

North America Customer-Site Training

Customer-site courses can be designed to fit the specific needs of your company and can substantially reduce employee travel costs.

Customer-site course tuition includes

- Course materials
- Training equipment (upon request)

Adept also provides split-shift and multiple-shift training upon request.

To schedule customer-site training or receive additional information

- E-mail training@adept.com
- Call Adept Customer Training at 925-245-3482
- Fax your request to 925-245-8108

In order to facilitate the best training experience possible, Adept requires the following for customer-site training courses:

Classroom

- Classroom or conference room
- Maximum of 12 students per session
- Ratio of 2 students per MV controller system for User and Programming courses
- Whiteboard or chalkboard
- Overhead or computer projector

Electrical Requirements

- PA-4 Power Chassis:
 - 200 to 240VAC, 3-Phase & 20 Amps
 - NEMA L5-20 20A, 250V Hubble Twist Lock provided
- AWC Training System:
 - 3 110VAC, Single Phase & 10 Amps minimum

Air Requirements

- Adept Robots: 80 psi minimum, 110 psi maximum, 1 CFM, clear dry air

Note: The AdeptOne, AdeptThree, AdeptOne-XL and AdeptThree-XL robots require air pressure to release the robot brakes. Air pressure may also be needed for grippers on all robots shipped for training classes.
